For PC and Mac:

Windows Mac

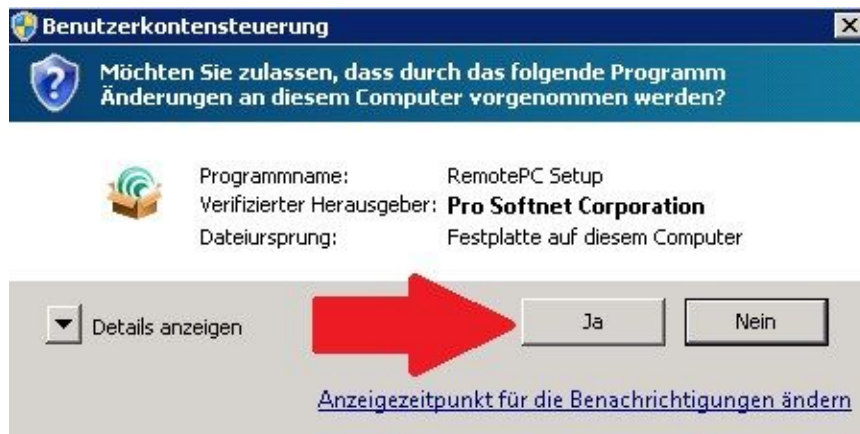

Version 7.4.4 Released on 01/03/2018 Version 7.4.4 Released on 01/02/2018

For Mobile:

Available on the App Store GET IT ON Google play

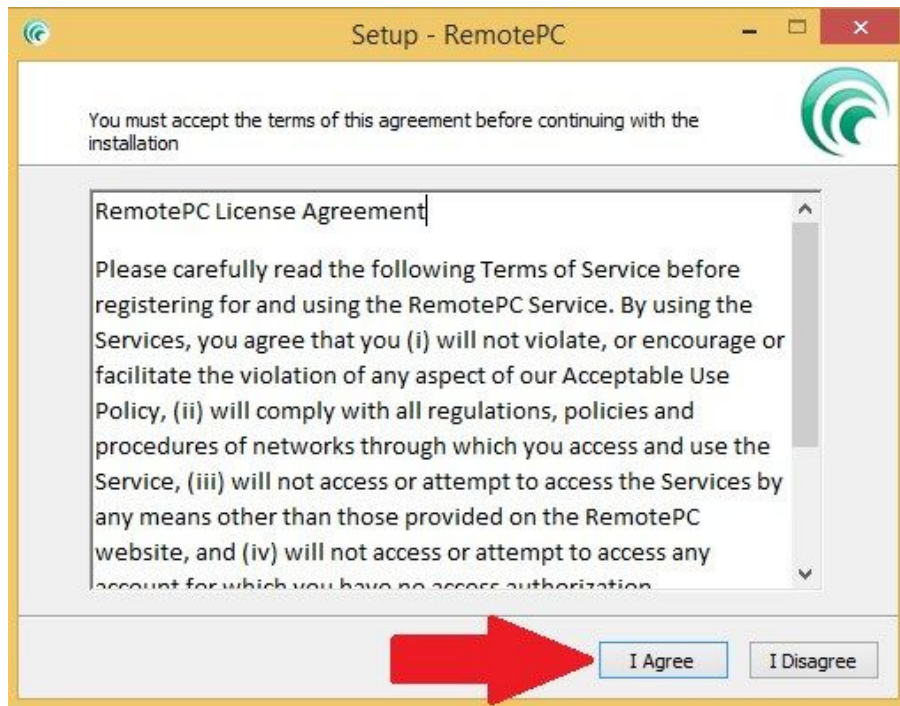

- Once the file is downloaded, please start the installation with a double click. Depending on your security settings, you may receive a UAC Windows warning message. Please press YES.

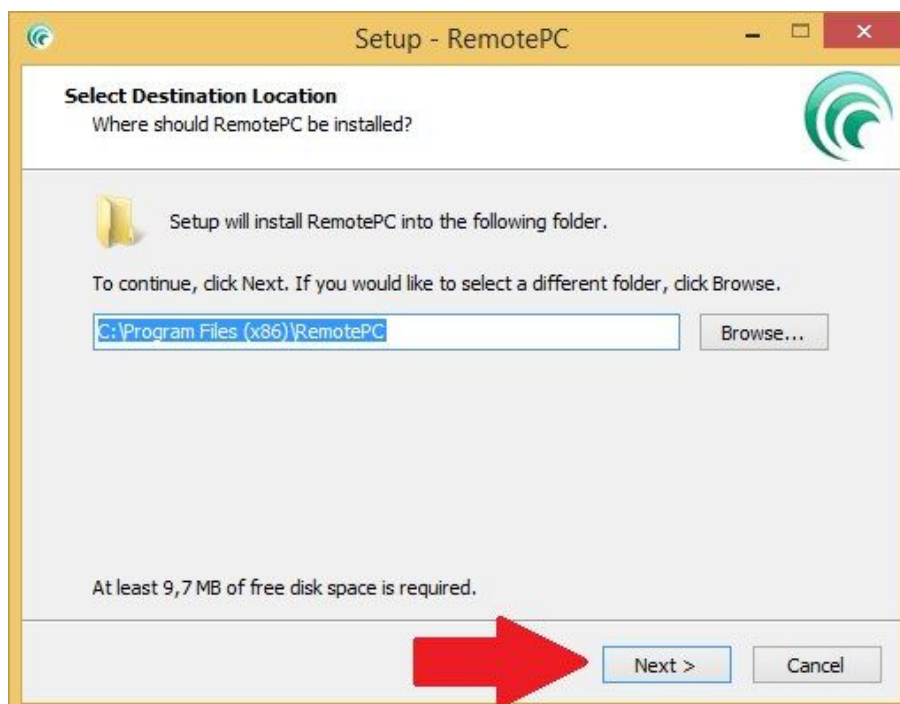

- When the setup window appears, press the NEXT button...

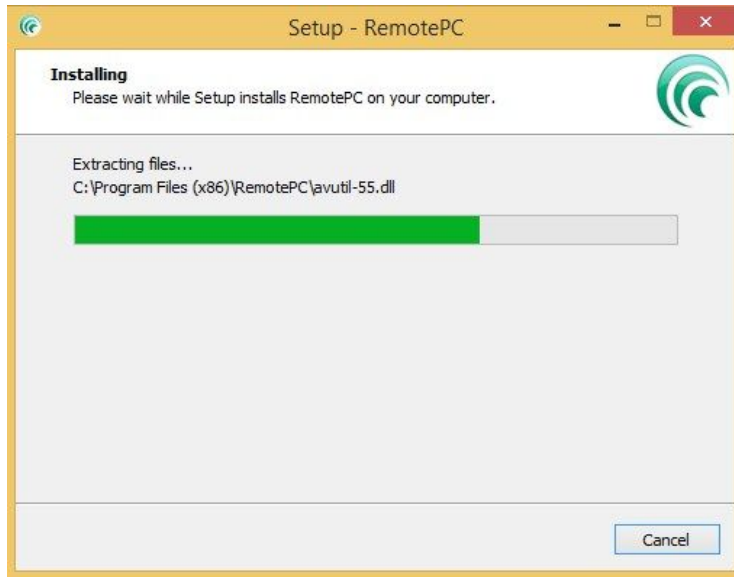

- ...and agree to the license terms.

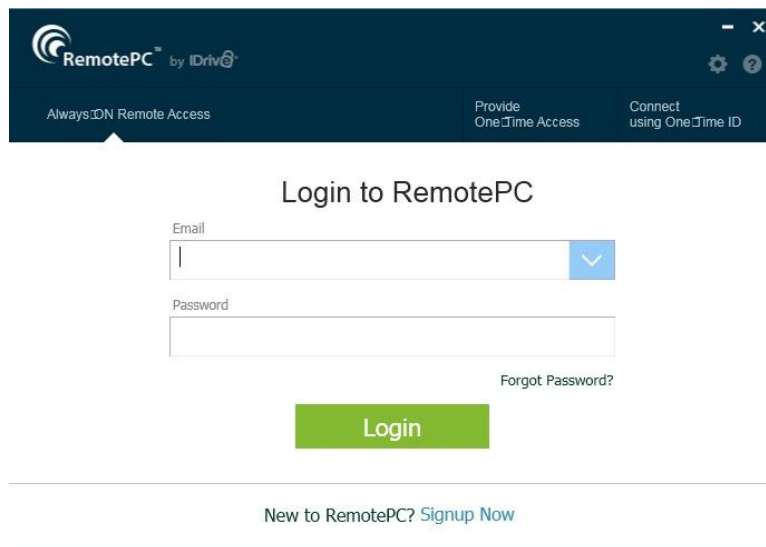

- The RemotePC remote maintenance software will be installed in the standard Windows installation directory, but of course you have the possibility to change this. If you do not want to change anything, click the NEXT button.

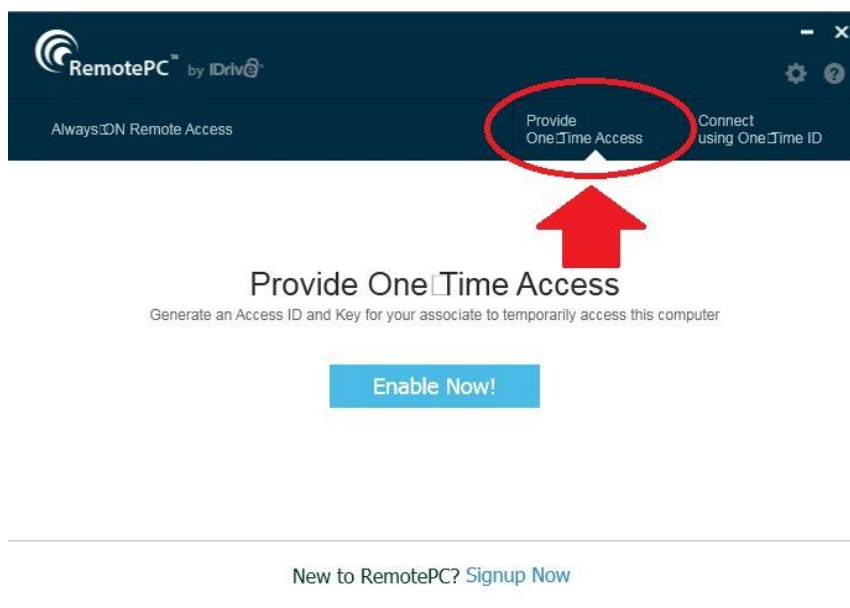

- Now the application is installed...

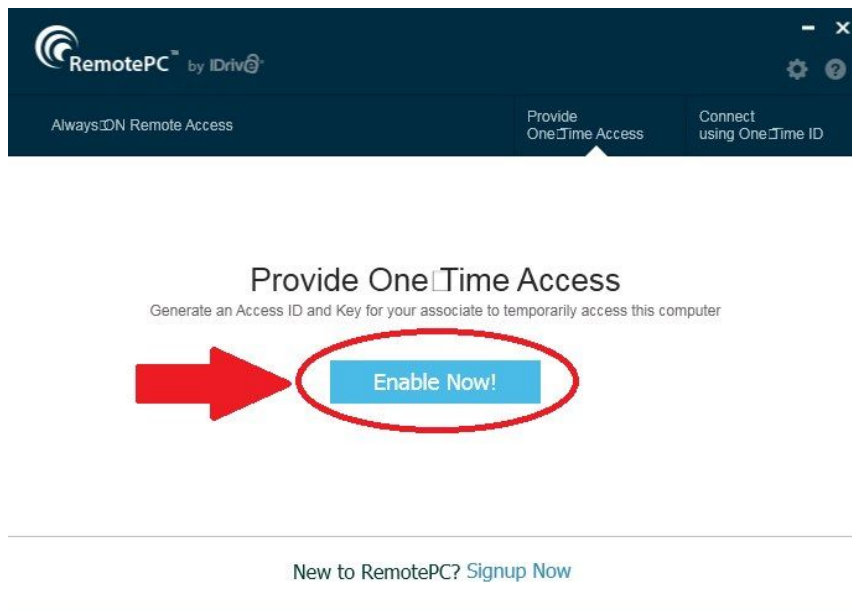

- ...and the panel window of **RemotePC** will be displayed

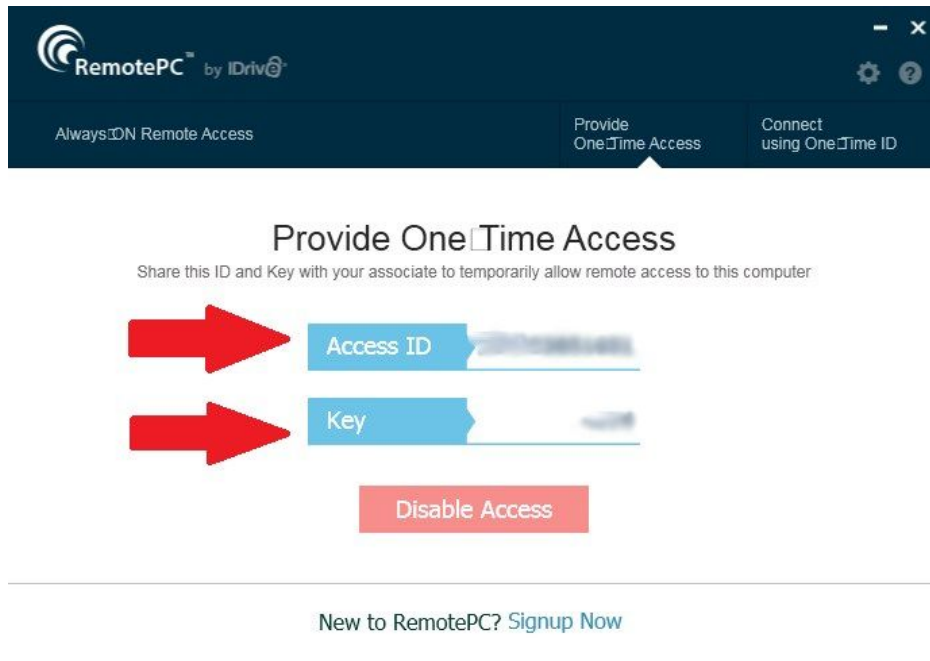

- The PROVIDE ONE TIME ACCESS area must be selected here.

- Then click the ENABLE NOW button to generate the access code

- You will give us this access code by telephone so that we can connect to your computer / server remotely.

You can cancel the remote connection at any time via the DISABLE ACCESS button!
